LPOIN is GND to use internal clock 32.768KHz
BT_REG_ON is GND to disable BT eneternal regulator circuitry.
Datasheet pg: 54 and
One UART interface can be enabled by software as an alternate function on the JTAG pins. UART_RX is available on the JTAG_TDI pin, and UART_TX is available on the JTAG_TDO pin.
The CLDO and LNLDO can be turned on and off based on the dynamic demands of the digital baseband.
